Hygiene Practices: Wash thoroughly after handling.

SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION - EXPOSURE GUIDELINES

Engineering Controls: Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the procedures for selection, training, inspection and maintenance of the personal protective equipment.

Eye/Face Protection: Wear safety glasses, to minimize eye contact during cutting operations. Recommended; chemical splash safety goggles

Skin Protection Description: Wear protective cotton gloves and clothing to protect against nuisance dusts.

Hand Protection Description: Nitrile rubber or natural rubber gloves are recommended.

Respiratory Protection: Where dust levels exceed the TLV, use a NIOSH approved respirator and PPE against nuisance dusts. Respiratory protection is not required for normal use of this product. If material is cut, ground upon, or sanded, NIOSH/MSH approved respirators for dust should be provided and worn.

Ventilation: Mechanical ventilation recommended for process machinery where dust generation is expected. Recommended; local or mechanical when cutting the product.
