

Building with conscience.

StoLite[®] Panel

Lightweight, prefabricated, continuous insulation wall panels

Facades

With StoLite[®] Panel, achieve any desired aesthetic using lightweight, prefabricated, continuous insulation wall panels. StoLite Panels can be used on any building, new or existing, where installation speed, minimal business disruption and quality are critical.

StoLite Panel

Non-structural, lightweight, prefabricated wall panels

Save time, labor and costs with prefabricated panels.

What if your next project could see all the time, labor and cost saving benefits of prefabrication and the energy saving benefits of continuous insulation in one system. With StoLite Panel, that is exactly what you get.

Prefabrication

StoLite Panels are manufactured using a careful quality control design process leading to greater product consistency and craftsmanship. Panel construction happens rain or shine making weather a non-factor during this step.

Lightweight for quick and simple installation

Starting at 1.5 lbs./ft² (7.3kg/m²), StoLite Panels have a limited impact on structural dead load and are safely and easily installed. And without a need for on-site rasping, basecoat/mesh, primer and finishing steps, StoLite Panels require less labor and install much faster than typical field-applied systems. This leads to minimal scaffolding and business disruption for owners.

Energy efficiency

Meet strict energy efficiency standards by using a continuously insulated system. As major cities employ climate protection strategies, deep energy retrofits of existing buildings are at the very top of their priority lists. StoLite Panels are a perfect solution to meet the challenges of not only implementing a system that works but also a strategy that is cost effective and scalable when labor shortages are a challenge.

Aesthetics

With StoLite Panel, enjoy total design freedom in color, texture, finish and materials. The key to unlocking your project's full potential is the idea that anything is possible.

Popular Project Types

StoLite Panel can be used for any project type. The benefits that accompany StoLite Panel make the following particularly popular.

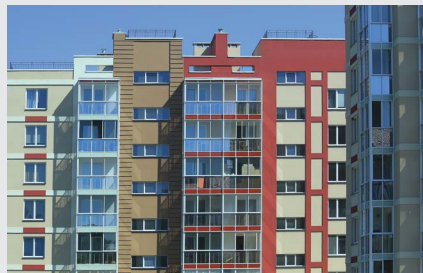

Retail

Student Housing

Healthcare

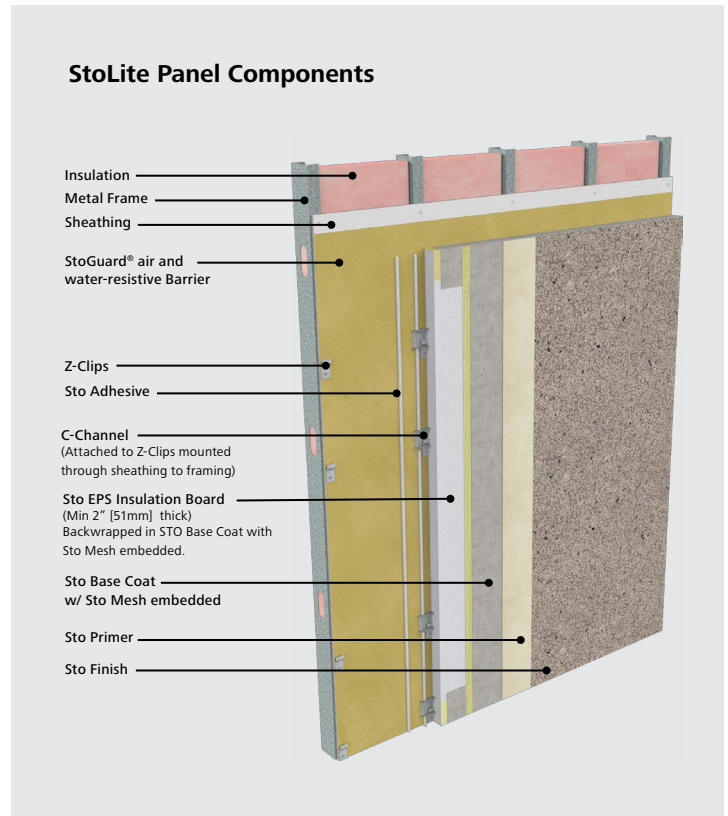

Multi-Family

Deep Energy Retrofit

| Features | Benefits |
|---------------------------------|--|
| Aesthetic Design Freedom | <ul style="list-style-type: none"> • Panels can be customized with any aesthetics in mind • Total design freedom in color, texture, finish and materials |
| Prefabricated Panels | <ul style="list-style-type: none"> • Greater consistency of product quality • Environmentally controlled manufacturing process makes weather a non-factor • Fast and easy installation • Requires less on-site labor |
| Continuous Insulation | <ul style="list-style-type: none"> • No thermal bridging • Energy efficient • Meets energy codes |
| Lightweight | <ul style="list-style-type: none"> • Starting at 1.5 lbs./ft² (7.3kg/m²), panels are easily and safely installed |
| Minimal Business Disruption | <ul style="list-style-type: none"> • Building use and customer access isn't limited during construction |
| Less On-site Construction Waste | <ul style="list-style-type: none"> • May contribute to LEED points |
| Minimal Scaffolding | <ul style="list-style-type: none"> • Installing completed panels reduces need for scaffolding |

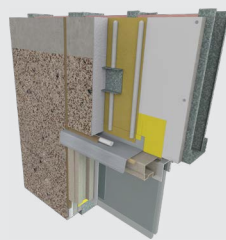

Receive unmatched design and technical support
